Rachel & the TreeSchoolers

Science in Action

This experiment supports concepts taught in
TreeSchoolers 3: Incredible Insects

ask

How do bees pollinate?

predict

I can use cheesy puffs to help me "pollinate" a flower.

Experiment

Materials

- flower printout (next page)
- crayons or colored pencils
- cheesy puffs
- scissors

1. **Print, color, and cut out**
   your flower - see next page

2. **Place cheese puffs**
   on the center of the flower.

3. **Eat the cheese puffs**
   and wipe your fingers
   on the center of the flower.

observe

What happened?

reflect

What do bees have on their legs to help them "catch" more pollen?
