

This experiment supports concepts taught in
TreeSchoolers 2: Plants & Flowers

ask

Can a plant grow in the dark?

predict

Plants need water, air and light.
A plant won't grow in the dark.

Experiment

Materials

- 2 small plants
- 1 cardboard box
- 1 pair scissors

Directions

- Put one plant in a place where it can get sunlight.
- Put the other plant in the cardboard box.
- Poke holes in the box so your plant can get air.
- Water plants as usual.
- Compare the plants at 1, 2, and 3 weeks.

observe

What happened?

reflect

What will happen if the plant that's in the box goes back out into the sun?
